

Get Green Future Enterprise without paying more

Use the renewables portion of your public purpose charge to purchase Green Future Enterprise to help your company reduce its carbon footprint without paying an extra penny!

Effective January 1, 2022, every Oregon business pays 1.5% of its electric bill to a fund directed by Energy Trust of Oregon.* If you use more than 8.7 million kWh (one average megawatt) at your site during the year, you can self-direct 25.5% of your public purpose charge to PGE Green Future Enterprise.

*Before January 1, 2022, Oregon businesses paid 3%.

You make the choice

By self-directing to Green Future Enterprise, you're supporting the type of renewable energy that's important to you, the community and moves us all towards a clean energy future.

Receive recognition for your leadership

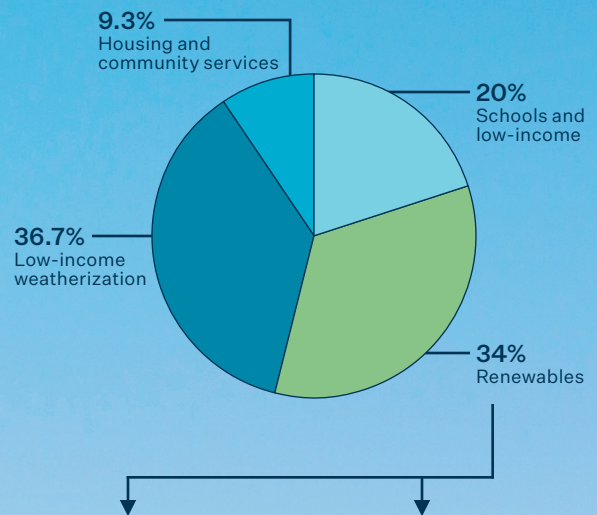

You're already paying a 1.5% public purpose charge on your electricity use. Why not use it to let your customers and employees know that you support renewable energy? When you self-direct your dollars to buy Green Future Enterprise, you receive publicity and advertising benefits, such as:

- Inclusion in prominent local advertising. Depending on your participation level, PGE may place public ads.
- Turnkey marketing tools like window decals and web graphics.
- Sample social media posts.

For more information, visit portlandgeneral.com/greenfutureenterprise.

You do not have to buy Green Future Enterprise to continue receiving your current electricity service from Portland General Electric. You may purchase similar products and services from other providers.

Oregon public purpose charge

Default	Self Direct*
Energy Trust of Oregon renewable programs	75% of renewables can be allocated to PGE Green Future Enterprise*

*The remaining 25% of renewables funds not allocated for self direction goes to support low and moderate-income activities.
