PGE facilities relocation

PHASE 1 PRE-DESIGN

Municipality/customer to provide:

Step 1: Contact PGE Service

Coordination at (503) 323-6700 to get assigned a PGE M# and Project Manager

Step 2: Provide:

- Inital conflicts list
- Project# and Project Manager
- Official project name
- Main point of contact + info
- Schedule and timelines
- Preliminary site plan/drawings/scope
- Frontage improvement requirements
- Temporary service requirements
- Permanent service requirements
- Street light requirements

NOTE: Any missing or inaccurate information may cause time delays to the project.

PGE to provide the following:

- Main point of contact and M#
- General timelines
- Preliminary information to help with initial project scope and budgeting
- Working clearances with existing overhead or underground facilities
- General vault & conduit requirements
- Next steps to move forward

Utility Relocation

Start at the following website: portlandgeneral.com/construction

PHASE 2 DESIGN

Municipality/customer to provide:

- 30/60/90% drawings and specs
- Permits & easements
- If underground is required, provide vault and conduit path per PGE drawings (only when pre-determined)
- Coordination with communication companies attached to PGE poles.

Timelines are based on the customer providing PGE with the needed information to complete the design.

PGE process:

- PGE preliminary design starts after 60% drawings are received
- PGE final design starts after 90% drawings are received
- Minimum 60 days for detailed design and construction drawing (prepared <u>after</u> all information is received)
- 2 weeks to 3 months apply and receive municipal permits*.
- After design completion: pre-construction meeting with SDPM, FCC and PM/Contractor
- Inspection of trench, conduit, etc.
- Site confirmation ready to send crew
- Total timeline varies based on project

*Some permits and/or easements can take longer (i.e. Railroad crossings, etc.)

NOTE: Long-lead materials (i.e. steel poles can take up to 1-year after design)

Contact PGE SDPM

A Project Manager or Project Engineer is assigned to project by region and/or work type. A project might have multiple PGE SDPM's assigned.

PHASE 3 CONSTRUCTION

Municipality/customer to provide:

- Ensure the construction site is clear before PGE crew arrival
- If there are corrections to be made the turnaround time extends. Must call PGE Service Coordination each time they need a re-inspection after turn downs.

PGE process:

- PGE line construction crews relocate PGE facilities
- Line crew construction time can vary based on the size and complexity of the job

Email communication

In email subject line:

- Project #
- Official project name
- PGE M# (once assigned after calling
- PGE Service Coordination)

In body of each email:

- Specific work request
- Job related drawings & specs
- Related PGE M#'s if multiple projects (i.e. New Service + Street Lights + Road improvement relocations)
- Requested timeline + contact info
