

RFP QUESTIONS & ANSWERS SUMMARY (PART 3)

RFP # PGE01-GID55-SH-001 - Engineering Design for the Summit-Meadows Wildfire Mitigation UG Conversion Project

RFP QUESTIONS			RFP RESPONSES		
#	Supplier Question	Question Date	PGE Response	Answer Date	RFP or SOW Update Required (Y/N)
70	In response to Question 29 of the RFP Q&A Summary (Part 1) , please confirm whether the required civil contractor construction feasibility report excludes geotechnical investigations, geotechnical studies, and associated engineering services.	9/30/2026	Yes. The required civil contractor construction feasibility review excludes geotechnical investigations, geotechnical studies, and associated geotechnical engineering services. As stated in the response to Question 1, geotechnical investigations are outside the scope of this RFP and, if determined necessary, would be procured separately by PGE. The purpose of the feasibility review described in Question 29 is to obtain a qualified civil contractor's assessment of the constructability of the underground installation between Pole D3907C-40 and Vault D3918A-423, including proposed means and methods, equipment, and resources necessary to safely complete the work. Offerors should not include geotechnical investigations or geotechnical engineering services as part of the required feasibility review.	10/1/2026	N
