

Choosing the right resiliency option for your business

Our top priority is delivering safe and reliable energy to our customers. We're continuing to innovate with offerings to help meet your ever-changing needs.

Your energy needs are evolving

We know it's important for our offerings to evolve as well. We're excited to share that our Energy PartnerSM On Demand and Energy Partner Resiliency programs now offer battery storage solutions that allow you to contribute to a clean energy future while also helping you prepare for emergency situations.

Determine which program is the best fit for your business

Each program offers rewards for participating in Peak Time Events, allowing us access to the energy stored in your battery, and/or letting us use your battery as an emergency stand-by resource. In addition, each program gives you 100% use of your back-up power during an outage.

Energy Partner On Demand

A customizable approach to sustainability and resiliency

- No minimum or maximum requirement for participation
- Participation is customizable — you set how much, how often, and for how long we dispatch your battery source
- Earn upfront incentives to help with the initial costs related to the battery purchase and installation

Energy Partner Resiliency

A resiliency solution for large scale operations

- Must be over 250 kW of nominated capacity of backup generation or storage
- We maintain and monitor your battery storage
- We're there from the start to make sure technical design meets program requirements and to invest in the cost of your battery storage
- Construction allowance tailored to your project
- Participation incentive is dependent on the total project cost, including PGE's portion
- Non-diesel generators may be eligible to participate as an emergency stand-by resource

That's just the start. If you're ready to learn more about how you can ensure uninterrupted operations while meeting your facility's sustainability goals, get in touch with your PGE representative or visit portlandgeneral.com/energypartner.
