

Pacific Northwest consortium named as a regional hydrogen hub

PGE WILL CONTINUE TO PARTNER WITH THE PACIFIC NORTHWEST HYDROGEN ASSOCIATION (PNWH2), TO EXPLORE HYDROGEN PRODUCTION TO HELP MEET OREGON'S ENERGY NEEDS

The PNWH2 Hub was selected to begin award negotiations with the U.S. Department of Energy's Office of Clean Energy Demonstrations (OCED) as part of this cutting-edge opportunity, marking the first step in a multi-year process to affirm hydrogen project feasibility, affordability, and impacts. PGE's project concept would utilize the site of the former Boardman Coal Plant, which was demolished in 2022, to locate a potential new facility to produce hydrogen to generate electricity, continuing PGE's investment in eastern Oregon.
