15	Technical	Was the RFI written with AMI 2.0 technologies in mind?	4/1/2025	The purpose of this RFI is to obtain information on the most recent advancements in Grid Edge technology, including AMI. PGE anticipates upgrading the existing AMI 1.0 technology within the next 5 years. PGE will consider several technologies and systems as part of this upgrade.	4/8/2025	N
16	Technical	How does PGE plan on controlling feeder assets for operational purposes? Would it be an extension of the technology sought in the RFI or a separate system altogether?	4/1/2025	PGE anticipates considering various technologies involved in control of feeder assets, depending on the characteristics of the assets themselves. Although traditional control systems (i.e. ADMS/EMS/SCADA/DERMS) are not the focus of this RFI, PGE is interested in how solutions integrate with those control systems and/or benefit their operation.	4/8/2025	N
