

PGE awarded grant for grid services demonstration project

**A \$4.5 MILLION GRANT FROM THE
U.S. DEPARTMENT OF ENERGY WILL
SUPPORT THE DEVELOPMENT
OF A DEMONSTRATION PROJECT
AT THE WHEATRIDGE FACILITY**

The project demonstrates mixed grid-forming (GFM) and grid-following (GFL) technologies at the Wheatridge Facility, fostering collaboration between grid engineers and inverter vendors to encourage utilities to adopt grid-forming capabilities. These technologies help support the stability of the electric grid.
