

2024 Green FutureSM Enterprise historic product content label¹

Green Future Enterprise is a Green-e[®] Energy certified Renewable Energy Certificate (REC) product. Renewable Energy Certificates (RECs) do not contain electricity. A REC represents the environmental benefits of 1 megawatt-hour (MWh) of renewable energy that can be paired with electricity. You can purchase RECs up to 100% of your PGE served electricity load, subject to availability, with a minimum purchase of 1,000 kWh per month. PGE is supplying your electricity. Green-e[®] Energy has only certified the RECs, which may be sourced from outside of your local electricity distribution area. For more information, see green-e.org/rec.

Here's how that compares to the average mix in the 2024 PGE Basic Service Mix:⁴

GENERATION LOCATION

National wind: CO (10%),
KS (80%), OK (10%)

40%	Natural gas	14%	Wind
21%	Hydro	5%	Coal
15%	Other and unspecified	5%	Solar

Green Future Enterprise is Green-e[®] Energy certified and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. [Learn more at green-e.org](https://green-e.org).

1. These figures reflect the renewables delivered to Green Future Enterprise customers during calendar year 2024. For the projected product content in 2025, please see: portlandgeneral.com/greenfuturecontent.

2. New renewables come from generation facilities that first began commercial operation within the past 15 years.

3. Product made up of new renewable resources averaged annually.

4. Based on energy served to retail customers within the State of Oregon, as required by the Oregon Department of Environmental Quality (ODEQ). Some or all of the renewable energy attributes associated with PGE's Basic Service Mix may be sold, claimed, or not acquired.
