

IDENTIFY CAUSE

Figure out where and what equipment needs upgrading or repair.

PLANNING AND PERMITTING

Design and engineer the project while working closely with permitting agencies to address environmental, traffic and safety concerns.

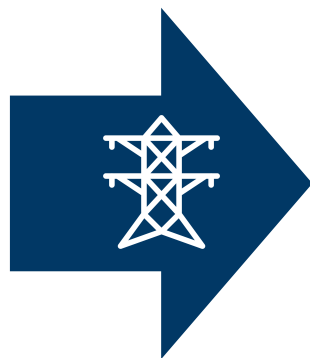

CONNECT WITH PROPERTY OWNERS

Reach out to private property owners to discuss trees, landscaping and access plans.

WORK BEGINS

Perform construction work to prepare for new equipment.

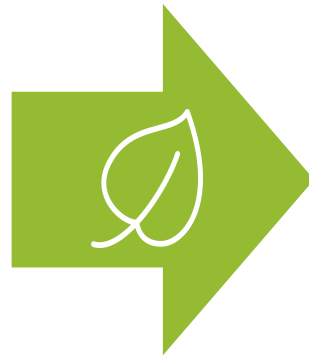

INSTALL EQUIPMENT

Install or repair equipment like power lines, underground cable, vaults and poles.

BRING EQUIPMENT ONLINE

Connect new equipment to the grid and bring new equipment into service.

LANDSCAPING

Restore and repair sidewalks, streets and landscaping in the work area.
