

Qualified products list

Commercial building heating, ventilation, and air conditioning (HVAC) systems are different than residential. Commercial spaces have additional ventilation requirements and there may be multiple HVAC systems with complicated set ups (i.e., dampers, sensors, zones).

Below is the list of smart thermostats that currently qualify for the Energy Partner Smart Thermostat program.

If you don't have a model listed here, reach out and meet one of our Energy Experts who can get you a free qualified thermostat and installation. Sign up on our website at portlandgeneral.com/epstlist for a free energy consultation with an Energy Expert. Or, email us at energy.consultation@pgn.com to get started.
