

Residential EV Charging Pilot Program Qualified Products List

Last updated: Nov. 20, 2020

This Qualified Products List is a comprehensive list of electric vehicle charging models that qualify for the Residential EV Charging Pilot Program's rebates.

Manufacturer	Model Name	Model Number
ChargePoint	Home Flex	CPH50-NEMA6-50-L23
ChargePoint	Home Flex	CPH50-NEMA14-50-L23

*PGE is working to add the following products to the program. Please check back to see if they've been added.

Manufacturer	Model Name	Expected to be Added by
Flo	Home X5	Q4 2020/Q1 2021
Enel X	JuiceBox 40 Hardwire	2021
Enel X	JuiceBox 32 Hardwire	2021

*Tesla EV chargers do not qualify for the pilot at this time. Unfortunately, Tesla does not produce any demand-response-enabled EV chargers at this time. All Qualified Products work with Tesla vehicles with a Tesla J1772 Charging Adapter. All Tesla vehicles should come equipped with a J1772 Charging Adapter at the time of sale. Please ensure that the use of the adapter conforms with your local and national codes, standards, regulations or laws.
