

# Residential EV Charging Pilot Program Qualified Products List

This Qualified Products List is a comprehensive list of electric vehicle charging models that qualify for the Residential EV Charging Pilot Program's rebates. To qualify for the rebate, your EV charger must be on this list.\* (We're adding more manufacturers and models all the time.)

Manufacturer	Model Name	Model Number	Date Added to Program
ChargePoint	Home Flex	CPH50-NEMA6-50-L23	10/23/2020
ChargePoint	Home Flex	CPH50-NEMA14-50-L23	10/23/2020
ChargePoint	Home Flex	CPH25-L25-P	10/23/2020
FLO	Home	X5	2/9/2021

\*All qualifying chargers must be hardwired for program participation.

PGE is working to add the following products to the program. Please check back to see if they've been added.

Tesla EV chargers do not qualify for the pilot at this time. Unfortunately, Tesla does not currently produce any demand-response-enabled EV chargers. All Qualified Products work with Tesla vehicles with a Tesla J1772 Charging Adapter. All Tesla vehicles should come equipped with a J1772 Charging Adapter at the time of sale. Please ensure that the use of the adapter conforms with your local and national codes, standards, regulations or laws.
