

Give your property a boost with electric vehicle chargers

Your partner through the process.

Adding EV charging to your commercial or multifamily property can be simple and affordable. Our experts help put you on the path to ease with site planning, installation and cost-saving incentives. Making your property EV friendly has never been easier or more affordable.

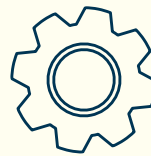

Pave the way to a clean energy future.

Transportation is Oregon's biggest carbon emitter, but more EVs can change that. Support EV drivers at your commercial or multifamily property by making charging accessible throughout the day, at work and at home. By providing convenient charging options, you can help create a cleaner future for everyone.

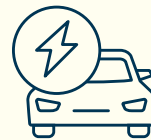

Big impact, solid investment.

Installing EV chargers at your property helps you stay ahead of the curve, make a positive impact and boost your property value. Plus, you'll be ready for any building requirements that may come your way down the road, ensuring long-term benefits and future-proofing your investment.

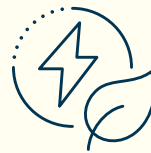

Power up your property with help from PGE.

Get support with site planning, installation and finding incentives to help reduce your costs.

Win repeat customers and long-term tenants by upgrading their experience and making charging easy.

Show your commitment to sustainability and enhance your property with clean energy technology.

Ready to get started?

Let's work together to differentiate your commercial or multifamily property and make driving EVs more accessible. Visit chargingmakeready.com or email us at chargingmakeready@pgn.com.
