

PGE Transportation Matching Fund

We're excited to see the impact electric transportation will have on Oregon's clean energy future. Strong adoption of electric vehicles depends on reliable, fast-charging infrastructure and thanks to funding from the Clean Fuels program, we're matching the external funding you've already applied for, for these projects.

Program specifics

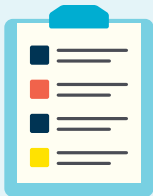

- For the 2022 program year, PGE has reserved up to \$400,000 for matching external funds.
- Applicants may receive a maximum of \$200,000 a year from PGE matching funds (pending remaining balance).
- External funds must be used for opportunities that relate to transportation electrification.
- Funding must be allocated by Nov. 1, 2022.

Eligibility

- Matching funds applicants should be one of the following:
 - Community-based organization
 - Nonprofit
 - Public body (public agency/ municipality)
 - Educational institution
- The majority of charging infrastructure must be within PGE's service territory *OR* the majority of project benefits must be to PGE residential customers.

Evaluation criteria

- PGE will use the following criteria to evaluate eligibility for fund matching opportunities:
- Will the proposed project support electrifying Oregon's transportation sector?
 - Will the proposed project benefit residential customers?
 - Will the proposed project benefit traditionally underserved communities?
 - Is the proposed project eligible for external funding?

Are you working on advancing local transportation electrification and have existing external funding you'd like us to match? Let's work together to get your project off the ground! Reach out to us at matchingfunds@pgn.com to get started.
