

No. 1 renewable program in America: Latest National Renewable Energy Laboratory ranking for number of renewable power customers and most renewable energy sold.

.....
200,000+ people
have chosen a
renewable power
option from PGE.

Information on environmental impacts

The environmental impact charts compare the environmental performance of this electricity product with the average profile for electricity generation in the Northwest, with respect to emission of key air pollutants (SO₂, NO_x), toxins (mercury), and greenhouse gases (CO₂) associated with energy generation from fossil fuels. Impacts also occur due to the effects of waste from nuclear power plants but are not represented in these charts. More information about the public health and environmental costs of those emissions can be obtained from the U.S. Environmental Protection Agency at epa.gov/cleanenergy or by calling the Oregon Department of Environmental Quality at 503-229-5696.

SUPPLY MIX

For 2019, the additional Clean Wind comes from a combination of Northwest and national wind generation sources.

ENVIRONMENTAL IMPACT

Amount of pollutants per kilowatt-hour of supply, compared to the Northwest U.S. average.

Clean Wind C&I is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Research Solutions. Learn more at green-e.org.

Your purchase of Clean Wind C&I Renewable Energy Certificates supports renewable energy production. The above chart shows if you purchased at 100% of your energy usage. Due to rounding, the sum of listed percentages may not equal 100. With Clean Wind C&I everyone has the option of purchasing whatever percentage they want (the minimum purchase is \$3 a month). You do not need to purchase this product to continue to receive safe, reliable power from PGE. You may buy similar products and services from other providers.
