

# Drive a Tesla?

## Earn \$50 for connecting your car.

By connecting your **Tesla through evPulse**, you will have your charging scheduled through the **PGE Smart Charging program**. Your participation will also provide insight into EV charging behaviors, helping us optimize our programs and benefits for EV drivers. That means **you'll help shape the future of EV charging — to make going electric easy for all!**

### How does it work?

Just complete our application and connect your car to evPulse:

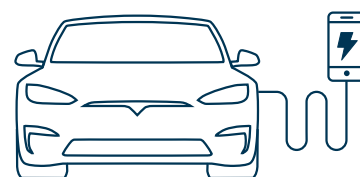

- **Complete the PGE online application.**  
You can find it at [portlandgeneral.com/homecharging](https://portlandgeneral.com/homecharging).
- **Connect your Tesla**  
by signing up for evPulse at [portlandgeneral.ev-pulse.com](https://portlandgeneral.ev-pulse.com).
- **PGE will email you to confirm your enrollment.**

### What about those rewards?

When you sign up, you'll earn \$50 right away. You'll also be enrolled in our Smart Charging Program, which automatically schedules your EV charging and rewards you for charging your vehicle during times when energy demand is lower. Our way of saying thank you is by giving you a \$25 Smart Charging participation reward at the end of each season. (There are two seasons: October to March and April to September.) Smart charging helps keep prices more affordable for all customers and allows us to rely on more renewable sources of energy during peak times.

### Ready to make a difference while earning rewards?

### EV programs by EV drivers for EV drivers

By giving us a glimpse into how real drivers charge their EVs, you'll play a key role in shaping what charging looks like in the near future. We'll learn from your experience to design better programs, services and pricing, all to make it easier for other drivers to go electric.
