We're upgrading Brookwood Substation to improve service

As we work toward Oregon's clean energy future, we're strengthening the energy grid to make it smarter, more efficient and more reliable for you. Among our many projects, we'll be upgrading our Brookwood Substation and the surrounding property.

Construction schedule:

- April 2020 through the end of 2021
- Monday through Friday, from 7 a.m. to 5 p.m.

While not anticipated, weekend and night hours may be required at times based on the needs of the project.

If you have a question about how this construction may affect you, contact us at 503-612-3730 or visit portlandgeneral.com/brookwoodsubstation.

What can you expect during this work?

PGE crews will upgrade and replace equipment within the substation fence. Tree trimming and vegetation management work will be performed on PGE property outside the substation fence. See project map for more details.

For safety, the substation property will be closed to the public. It will not reopen after construction is complete. If you use this path to reach the nearby MAX station, you will need to plan a different route, as this path will no longer be open.

We're taking steps to ensure your safety. Here's how you can help:

- **Watch for temporary lane or street closures and detours.** Allow extra time for commuting through these areas.
- **Follow directions from any flaggers, detours and signs** used to keep drivers, cyclists, pedestrians and workers safe.
- **Watch for "no parking" signs.** To keep pedestrians and vehicles safe, we will reserve street parking to make room for equipment and create a safety buffer around our work area.
- **Please avoid all work areas and equipment,** and make sure children know to never touch the equipment.

Building a brighter energy future for you

This is just one of many projects we're working on to enhance and modernize the energy grid, making it smarter and more resilient, and creating a platform for a clean energy future.

Thank you for your patience as we strengthen the energy grid.
