

Energy Partner On Demand

Your business's customizable approach to sustainability and resiliency

Take action. Get financial incentives.

There are certain times throughout the year when higher strain is placed on the electrical grid — like hot afternoons or cold mornings — resulting in what we call “Peak Time Events.” Through Energy Partner On Demand, our experts help you identify ways your business can shift its energy use during these peak times. On Demand is flexible and customizable, allowing you to participate when it makes the most sense for your business. And by partnering with us to help keep power reliable, affordable and sustainable, you'll not only be saving your business money, but you'll be earning some too!

Power through the unpredictable.

We can't keep things from going wrong, but with Energy Partner On Demand we can help you be ready when they do — power through emergencies and maintain your critical operations during outages with onsite battery storage. With Energy Partner On Demand, you can use upfront incentives to help with first-costs associated with your battery storage setup.

Real environmental leadership

When businesses like yours choose to shift your energy use, Oregon's energy future looks brighter and a lot more clean. Together, we are building a cleaner, more reliable energy future for all.

Earn incentives by participating in Peak Time Events.

Prepare for the unpredictable with backup battery storage.

Contribute to Oregon's clean energy future.
