

Going green can be easier than you think

Supercharge your fleet with custom incentives and engineering support to electrify your fleet with Fleet Partner

PGE Fleet Partner program can support you in electrifying your fleet through assessments and analysis, design and planning, and even custom incentives for construction.

During the Plan phase, a PGE engineer will work with you to plan out your project and provide you with a Fleet Partner Study — a free feasibility study. There's no cost to receive the Fleet Partner Study and no obligation to proceed with the program.

During the Build phase, we'll provide:

- Turnkey final design and construction of make-ready infrastructure
- A custom make-ready Incentive based on forecasted energy use of the chargers up to \$400,000
- PGE ownership and maintenance of make-ready infrastructure for 10 years

Let's work together to reduce your carbon emissions and your operating costs, all while supporting a cleaner future for Oregon.

FLEET PARTNER REQUIREMENTS

- Charging site(s) must be in PGE service territory
- Pay for any make-ready costs not covered by the custom cost incentive
- Add a minimum of 70 kW of new load (usually equivalent to 10 Level 2 ports or 1-2 DC fast chargers)
- Purchase and install PGE-approved, networked, Level 2 or DC fast chargers
- Keep chargers operational and share charging data with PGE for 10 years
- Commit to forecasted energy use of the chargers
- Sign an easement covering PGE-owned infrastructure
- No concurrent construction that would impact the design or installation of make-ready infrastructure

Titan Freight paves the way for sustainability

Since 2019, Titan Freight has been making strides to reduce their impact and use more renewable resources in their operations. By partnering with PGE through the Fleet Partner program, they've become Oregon's first carrier operating 100%-electric heavy-duty vehicles!

"We now have a zero-emissions, lower operating-cost tool to help us get closer to realizing our sustainability goals."

— Jason Altamirano
VP & COO
Titan Freight

The City of Tigard is committed to a cleaner, healthier environment

The City of Tigard recognizes that an electric fleet provides key operational savings, including lowering the cost of fuel and maintenance requirements. They partnered with PGE to electrify their municipal fleets and build electric vehicle charging stations.

"Without the Fleet Partner program, we couldn't have gotten our site outfitted as quickly as we did."

— Kevin M. Cole
Fleet & Facilities Operations Manager
City of Tigard

The PGE Fleet Partner program takes the guesswork out of transitioning your fleet and puts you on the road to realizing both your sustainability and economic goals.
