

News from ABP

2025 is another year of publishing *Acta Biochimica Polonica* by Frontiers. Equipped with a great editorial and publishing platform, we were able to disseminate many excellent articles, presenting a significant advance in biochemical research. This would not be possible by the efforts of the authors and a great work done by the editors who are greatly acknowledged. By keeping very high standards, we serve as the medium for presenting exciting discoveries in original papers and summaries/comments in review articles. I would also like to call the attention of our reader to our eBook entitled "*Acta Biochimica Polonica (ABP) | 2023-2024 Retrospective*" which contains papers published in the journal during 2023/2024. This was the time of starting the fruitful collaboration between Polish Biochemical Society and Frontiers, and I encourage biochemists to look at its effects.

Prof. Grzegorz Węgrzyn
Editor-in-Chief

Our Special Issues

We have 14 Special Issues covering a wide range of topics such as fermentation bacteriophages, adeno-associated virus gene therapy, bacteria in agriculture, p53 protein, and protein uptake by plants, led by teams of experts from 8 countries including:

- Malgorzata Ziarno, Warsaw University of Life Sciences in Poland
- Prassan Choudhary, Amity University in India
- Gorji Marzban, Boku University in Austria
- Kazuhiro Oka, Baylor College of Medicine, Houston in US

Editorial Board

Our active Editorial Board has experts in various fields of biochemistry including enzymology and metabolism, membranes and bioenergetics, gene structure and expression, nucleic acid and carbohydrate structure, and more. We are looking for new members to our Editorial Board with expertise in, but not limited to:

- Cancer biochemistry/genetics/biology.
- Clinical biochemistry.
- Structural biology.
- Biochemistry-oriented bioinformatics.

Conferences of Interest

Acta Biochimica Polonica is always interested in promoting relevant events for the biochemistry communities.

Organizing or participating in an event? Please get in touch to discuss how we may assist you in involving our community.

frontiers

| Publishing Partnerships

ABP's authors may benefit from Open Access Publishing Fees support from their institution through the Frontiers' **National** and **Institutional** Agreements. Frontiers is an award-winning Open Science platform and a leading Open Access scholarly publisher. Find out more about our Publishing Partnerships [here](#).
