

News from ABP

The journal entered the new year, 2026, with many hopes and plans. Acta Biochimica Polonica develops well, and it continues its great function as a medium for disseminating research results, opinions and comments on all aspects of biochemistry and related specializations. We keep high publication standards, by both merits of accepted articles and editorial quality of published papers. This would not be possible without the hard work of authors submitting results of their research to our journal, editors who conduct the processing of submitted papers, reviewers who evaluate the works, and editorial staff who work on appropriate appearance of the articles in their final form. We hope for further development of the journal, and look forward to publishing exciting papers in different fields of biochemistry.

Prof. Grzegorz Węgrzyn
Editor-in-Chief

Recently Published Articles

Articles Selected by the Editor-in-Chief

**Advances in endothelial
cell targeting by AAV
vectors**

Milena Cichon et al

**Prevalence of vitamin D
deficiency and related
factors among adults in
Tokat province, Türkiye**

Muzaffer Katar et al

**Structural potential of
the 5' noncoding regions
of the mRNAs encoding
p53 isoforms**

Mariola Dutkiewicz et al

Our Special Issues

We have 21 Special Issues covering a wide range of topics such as abiotic stress in plants, endothelial mitochondria, flow cytometry, rare diseases, vision disorders, biochemistry of aging, fermentation bacteriophages and p53 protein, led by teams of experts from 13 countries including:

- Dorota Katarzyna Dymkowska, Polish Academy of Sciences in Poland
- Raif Yuecel, University of Exeter in UK
- Satya Yadav, University of Oregon in US
- Prassan Choudhary, Amity University in India

Editorial Board

Our active Editorial Board has experts in various fields of biochemistry including enzymology and metabolism, membranes and bioenergetics, gene structure and expression, nucleic acid and carbohydrate structure, and more. We are looking for new members to our Editorial Board with expertise in, but not limited to:

- Cancer biochemistry/genetics/biology.
- Clinical biochemistry.
- Structural biology.
- Biochemistry-oriented bioinformatics.

Conferences of Interest

Acta Biochimica Polonica is always interested in promoting relevant events for the biochemistry communities.

Organizing or participating in an event? Please get in touch to discuss how we may assist you in involving our community.

frontiers

| Publishing Partnerships

ABP's authors may benefit from Open Access Publishing Fees support from their institution through the Frontiers' **National** and **Institutional** Agreements. Frontiers is an award-winning Open Science platform and a leading Open Access scholarly publisher. Find out more about our Publishing Partnerships [here](#).
