

HYALURONIC PLUMPING SERUM

WATER BASED PLUMPING SERUM FOR ALL SKIN TYPES

SKIN TYPES AND CONDITIONS: FOR ALL SKIN TYPES, DEHYDRATED, AGING

DESCRIPTION

Utilizes three unique forms of Hyaluronic Acid for intense hydration. It helps replenish the moisture content of aging and environmentally exposed skin. Smooths the look of fine lines, restores youthful radiance and helps increase the skin's ability to retain moisture, leaving skin plump and fabulous.

A FEW KEY INGREDIENTS & BENEFITS

Hyaluronic Acid: Water binding, lubricating, protective agent capable of attracting up to 1,000 times its weight in water from moisture in the air. This product utilizes three different molecular weights of hyaluronic acid which provides ultimate hydration and plumping for the skin. Hyaluronic acid is a polysaccharide found naturally in every tissue of the body. It is the natural gel between skin cells that serves as a water reservoir for the cells.

Panthenol: Deeply hydrating. Its moisturizing properties improve stratum corneum hydration, reducing transepidermal water loss and therefore helping to maintain skin elasticity and softness.

Allantoin: Anti-inflammatory, helps alleviate and prevent irritated skin.

USAGE INSTRUCTIONS

Use AM and PM. Gently massage a small amount into face, neck and décolleté.

FULL INGREDIENT DISCLOSURE

Aqua, Aloe Barbadensis (Aloe) Leaf Juice, Sodium Hyaluronate, Glycerin, Panthenol, Allantoin, Phenoxyethanol
