

LICORICE ROOT ADDITIVE

HYPERPIGMENTATION RELIEF ADDITIVE

SKIN TYPES AND CONDITIONS: FOR ALL SKIN TYPES, SUN DAMAGED, SENSITIVE

DESCRIPTION

A multipurpose botanical that helps brighten, calm and soothe the skin.

A FEW KEY INGREDIENTS & BENEFITS

Glycyrrhiza Glabra (Licorice) Root Extract: Recent research indicates that licorice root extract shows promise as a soothing ingredient for the relief of eczema. Studies have shown it may be of benefit in skin lightening as it contains liquiritin and isoliquertin, as well as flavonoid containing glycosides, which induce skin lightening by dispersing melanin pigment and enhancing more even pigment distribution.

Matricaria Recutita (Chamomile) Flower Extract: Contains active flavonoid compounds which are particularly advantageous in the care of sensitive skin. Also has anti-inflammatory properties, anti-free radical action and helps with inhibition of superoxide radical synthesis.

USAGE INSTRUCTIONS

Apply 1-3 drops as an additive to cleansers, masks, moisturizers or as desired.

FULL INGREDIENT DISCLOSURE

Glycerin, Aqua, Glycyrrhiza Glabra (Licorice) Root Extract, Matricaria Recutita (Chamomile) Flower Extract, Potassium Sorbate, Sodium Benzoate)
