RECENT PROJECTS

Library Webapp

Axios, Express.js, Material-UI, MongoDB, Mongoose, Node.js, React.js, TypeScript

A web-based application as a library that fetches books from MongoDB database through custom APIs for CRUD (create, read, update and delete) operations on books. It has a sign-in option such as Google Login or normal login using username and password. Users can borrow and return books, update personal info, change the password, or request a new password in case they forget it. Admin users can create, delete, or update the information about the books.

A Preassignment for Integrify

Axios, CSS, HTML, Material-UI, React, React Hooks, React Router, useMediaQuery hook of Material UI for responsiveness

An application that fetches and displays user data in a card and redirects users to the page with all the remaining information.

Tindog Website

Bootstrap, CSS, HTML

An mock-up landing page for an application that serves as a clone of Tinder for dogs and their owners.

Countries Webapp

Axios, Material-UI, React

A web-based application that fetches the data from an external API to help its users view a list of countries in the world, and search and filter them.
