PROFILE

Yazan is a talented Full Stack Developer with over a dozen client projects under his belt. He is capable of working with a wide range of technologies whether for building solutions from scratch or working with existing code bases. Formerly, Yazan was in charge of more than 20 talented young professionals in one of Integrify's training programs in Full Stack Development.

RECENT PROJECTS

Dwellet

TypeScript, React, Redux-Saga, NodeJS, AWS, Serverless

Worked as a consultant on the front-end and back-end of the client website. On the front-end, worked on new features, debugging, and code refactoring. On the back-end, worked on testing and email templating.

KnoMe

Typescript, ReactJS, Gatsby, GraphQL, Netlify, Contentful, CircelCI, Storybook

Worked as a consultant to create a landing page for the client. Also, acted as a team leader.

Measur

Typescript, ReactJS, Gatsby, GraphQL, Netlify, Contentful, CircelCI, Storybook

Worked as a consultant to create a website for the client. Also, acted as a team leader.

Me-säätiö

React, TypeScript, Storybook

Worked as a consultant to create a component library to be used across multiple website of the client.

CV-Builder

React, Apollo Client, GraphQL, GraphQL-yoga, Prisma

Built an internal tool for Integrify to create and effectively manage the CVs of its consultants and soon-to-be graduates.

Automated Tool for Student Screening & Testing

React, NodeJS, Express, MongoDB

Built an internal tool for Integrify with two sides: applicant and admin dashboard. The purpose of the tool is to screen applicants before proceeding to in-person interviews.

Töölö Urban

React, Gatsby, Contentful

Worked as a consultant to migrate 6 different client websites from Gatsby v1 to v2.

inklusiiv.org

React, Gatsby, Contentful

Created a website for the project that aims to promote inclusivity across the Finnish tech industry.

SKILLS

Front end: CSS, Gatsby.js, HTML, JavaScript, React.js, Redux, Storybook, TypeScript.

Back end: Express.js, GraphQL, Node.js.

Database: MongoDB, PostgreSQL.

Testing: Jest, React Testing Library.

Content Management System: Contentful.

DevOps / Cloud: AWS, CI/CD, Serverless.
