## PROFILE

---

Trang is a business-minded Full Stack Developer with diverse work experience. Trang has worked with several e-commerce platforms to build websites for customers and consulted these customers on how to grow their digital businesses. Following her degree in Business Management, Trang is pursuing a degree in Business Information Technology while extending her hands-on experience in full-stack development. All in all, Trang is a strong match for a team looking for a developer who understands the business objectives and customer value behind her code.

## RECENT PROJECTS

---

### Money Management App

MERN Stack (MongoDB, Express.js, React.js, Node.js), Firebase

An application with different routers built for managing and editing daily expenses, overall income, and savings.

### Public Chat Room

Node.js, Express.js, Socket.io

A public chat application with different chat rooms for logged-in users to choose from. This application can support multiple logged-in users at the same time.

### Car Agency Website

Odoo

An e-commerce platform built for a private car agency in order to reach potential customers. Although this platform was developed with open-source software, the application also has custom-built modules in order to best meet the needs of the business.

### Building Material Website

WordPress

A website built for a B2B seller of building materials. The website displays the images of the products and utilizes the click-optimization strategy in order to improve customer experience and deliver relevant information to the users. Based on customer feedback, various features and functions such as the menu were updated.

## SKILLS

---
