- Finnish - Novice
- Vietnamese - Native

PROFILE

With a background in Information Technology, I have worked hard to acquire solid experience in Web Development and UI/UX Design. I excel at creating responsive websites while designing all the graphics for them. I aspire to work as a Junior Web Developer and meet all the standards set by your team.

RECENT PROJECTS

Measur (in-progress, private repository)

JAM stack (React, Gatsby, Contentful), TypeScript, SASS, Jest

Measur is a website that has a webshop, chat bot and blog entries. I was responsible for the UI/UX design and front-end development.

Portfolio

React, Bootstrap

It is a static website that features my portfolio.

Music App

React, Context API

Being inspired by Musixmatch API, I created this app to present a list of the most popular songs with the ability to search through them.

Contact Manager

React, Redux

This app fetches the data from JSONPlaceholder. Users can add new contacts, and edit and delete them.

Age Calculator

React Native/ Expo

It is a mobile app that shows users how old they are by letting them type their age in the input field. In addition, this app handles various errors and exceptions if the users do not give correct values.

SKILLS

CORE

- HTML
- SCSS/SASS
- JavaScript
- React
- Jest
- React Native/Expo
- C#
- TypeScript
- Adobe Illustrator
- Adobe Photoshop
- Figma
