PROFILE

Bui is a determined Full Stack Developer who has proven his skills as a part of a development team delivering a customer project. Bui is also skilled as a designer and knows how to translate the requirements from end-customers to stunning User Interfaces. Bui has recently earned a graduate degree in Information Technology. All in all, Bui is a strong fit for a team looking for an easy-to-adapt and know-it-all developer with experience under his belt.

RECENT PROJECTS

Shopping Cart

React.js, React Query, Material-UI

An e-commerce application with the most essential functions such as adding products to user carts and featuring the descriptions for each product.

COVID Tracker App

React.js, Material-UI

A project for fetching live data for people affected by the COVID pandemic in each country.

JuzTalent

TypeScript, React.js, Next.js, LESS, SCSS, Material-UI, Redux, Redux-Saga, MobX, REST API

Designed and contributed to the front-end development of a Human Resource Information System during employment at Kyanon Digital. Communicated directly with the end-customer in order to complete the design for the system. Supported the back-end development team during the development cycle.
