

BIKASH GHIMIRE

FULL STACK DEVELOPER

Helsinki, Finland

Bikash is an excellent example of a competent Full Stack Developer who has fluency in numerous programming languages and carries a high attention to detail. He has learned the intricacies of Web Development and has worked as a Solderer, specializing in phone and computer hardware. Moreover, Bikash has proven to be a strong team player and communicator who never fails to keep a positive attitude even in stressful situations. In all respects, Bikash is a great addition to all software development companies looking for an ambitious and highly motivated team member.

MySQL, MongoDB.

OTHER

Algorithms and Data Structures, JSON, Linux, Networking.

LANGUAGES

English - Fluent

Finnish - Novice

ACCOMPLISHMENTS

Front End Web Developer - freeCodeCamp (February 2019).

RECENT PROJECTS

Web Development

HTML, CSS, Bootstrap, PHP, SQL

Deep expertise and hands-on experience with Web Applications along with security and session management, as well as programming languages such as HTML, CSS, PHP, and API's. | Integrated data from various back-end services and databases and maintained software documentation. | Organized by The Dude Project, part of a research and development initiative within Åbo Akademi.

Arduino Game

Raspberry pi, C++

Worked within a team to create and deliver a game based on Arduino technology using raspberry pi and c++ programming language as part of the final product for a university event. I familiarized myself with JIRA, Agile methodology and Github while doing this project. Daily scrum meetings were held and progress was tracked using Trello. For the final product, the integration of different libraries of C++ embedded language was required. These final products included a memory game and a remote controlled Car.

EXPERIENCE

FULL STACK DEVELOPER

Integrify | Helsinki, Finland | January 2022 - Present

- Sharpening competence as a Full Stack Developer by collaborating with other developers of different seniorities on a diverse range of projects and real-life challenges.
- Focusing on front-end development with JavaScript, TypeScript, React.js, Redux in addition to other technologies and concepts such as accessibility and animations.
- Building back-end for web-based applications with frameworks such as Node.js and Express.js.
- Covering additional concepts such as API development and documentation, unit testing with Jest, SQL and NoSQL databases, and version control with GitHub.
- Working with DevOps practices (Bash scripting, Docker containers, and CI/CD with GitHub Actions) and Cloud Services with AWS.
