PROFILE

Bilal is an experienced software developer who has been particularly dedicated to gaining a deep level of understanding in programming – both practical and theoretical level. He is an ambitious developer currently finishing his master's degree at the University of Lahti, majoring in Software Product Management and Business studies. Bilal states that he is eager in learning new technologies and constantly challenging himself professionally. Bilal would be a great addition to a technical team that is looking for a developer with motivation, determination, and eagerness to learn.

RECENT PROJECTS

Real-Time Ski Track

React Native

An application built for and delivered to the city of Imatra. This project was built to address the need of having real-time information on ski tracks and showing the conditions of each track.
