## PROFILE

An is a multitalented Full Stack Developer who has proven and established herself in other fields. She has obtained a Bachelor's degree in Business Information Technology that allows her to better understand the business objective behind the development projects to which she heavily contributes. At Integrify, she has participated in the remodeling of its website in addition to currently supporting its consulting team with a client project. At her future workplace, An is eager to further exceed the value of her former contributions.

## RECENT PROJECTS

### Valpas

React Native, TypeScript, Expo, Redux, Redux-Saga, NativeBase, React-native-maps, Detox, Node.js, AWS Serverless, GitHub Actions, Contentful

An ongoing project for a client who is launching a mobile application for B-2-B recruitment. In this project, An is contributing to the development as a part of a team of Full Stack Consultants at Integrify.

### Integrify Websire Remodel

React.js, Gatsby.js, TypeScript, SASS, Contentful

Contributed to the remodel of the official website of Integrify. The contributions included applying SASS animations and working with Contentful CMS.

### E-Commerce Application

MERN Stack (MongoDB, Express.js, React.js, Node.js), TypeScript

An e-commerce application that allows its users to browse products and log in with either their Google accounts or by creating a local username. Users can also make orders and check their carts as well as updating their personal information on their accounts.

### Italian-cuisine-recipe

JavaScript

An application that fetches the data from an open API source and allows the users to search recipes, update serving sizes, add recipes to a shopping cart, and press "like buttons" for recipes.

### Anime Shop

WordPress

A personal project that consisted of working locally with WordPress to experiment with plugins and improve abilities related to designing a website.
