## PROFILE

Quan is an adept Full Stack Developer with experience leading development teams. In addition to pursuing his Bachelor's degree in Information Technology, he has gained and strengthened his understanding of workflow and communications in a professional working environment. More specifically, he developed systems and applications in the fields of healthcare and consumer services. Quan is eager to make a valuable contribution to his future projects and tackle all the challenges.

## RECENT PROJECTS

### A collaborative project for Päijät-Häme Joint Authority for Health and Wellbeing

PHP, Symfony, Laravel, SASS, JavaScript, MySQL, REST API

A project completed collaboratively with other developers of different seniorities during university-level studies. The project consisted of a system developed for Päijät-Häme Joint Authority for Health and Wellbeing that would be used for managerial and scheduling purposes. Quan served as the leader and manager of the AdminUI team with 2 other teams being the Backend and AdminUI teams.

### A thesis project for Päijät-Häme Joint Authority for Health and Wellbeing

PHP, Laravel, SASS, Unix, VirtualMachine, WordPress, MySQL, REST API

A thesis project for a healthcare organization, Päijät-Häme Joint Authority for Health and Wellbeing. As a sole developer, independently finalized an "Event Scheduling and Managing" application into stage that can be put on production based on initialized project specified by the client.

### Idle Heroes VN Project

PHP, Laravel, SASS, REST API

An individual back-end project built to gather contents and provide them to display on the front-end side through various APIs. The business objective of the project is to provide information in the Vietnamese language about a game called "Idle Heroes".
