PROFILE

Dung is a motivated Full Stack Developer with a strong understanding of business. He truly is a combination of a highly social team player who has a customer-centric approach to problem-solving.

RECENT PROJECTS

Integrify Website Remodel

React.js, TypeScript, Gatsby.js, GraphQL

A remodel of the Integrify website with a refreshed look that is faithful to the core identity of the organization while vastly improving the user experience and information flow.

Online Library

React.js, Redux, TypeScript, Material-UI, Node.js, Express.js, Rest API, MongoDB

An online library where registered users can search for and borrow books. Admin users can add, update, and remove books and authors. A personal project completed at Integrify.

Personal Portfolio Template

React.js, TypeScript, SASS, Material-UI

A responsive personal portfolio with animations featuring personal information, tech stacks, blog posts, projects, and a contact form. A personal project completed at Integrify.

Chat App

Node.js, socket.io

A prototype application where users can send real-time messages to other users also connected to the same server. A personal project for educational purposes.

Social Media App

React.js, CSS, Material-UI, Redux, Node.js, Express.js, Firebase

A simplified version of Twitter where users can sign up, log in, upload profile pictures, edit their information, create posts, and comment on the posts of other users. There is also a notification panel that provides updated information to the users. A personal project for educational purposes.

E-Commerce Website

React.js, CSS, Node.js, Express.js, Stripe (for handling payments)

An online shop where users can buy from the listed in-game Fortnite items. It simulates a typical buying process from adding items to cart and making payments. A personal project for educational purposes.

SKILLS

Front end: CSS, HTML, JavaScript, Material-UI, React.js, Redux, SASS, TypeScript.

Back end: Express.js, Node.js.

Database: MongoDB, MySQL.

DevOps: Firebase, Heroku, Netlify.
