PROFILE

Tram is a passionate Full Stack Developer who is active in the community and passionate about broadening her skill set. Most importantly, Tram is a calm and supportive person and she is always pleasant to have as a part of a team.

RECENT PROJECTS

Restaurant E-Commerce

MERN Stack (MongoDB, Express.js, React.js, Node.js)

A website that allows the users to find information such as restaurant menus. The admin users, owners of the restaurants can add, edit, and delete items on the menu, as well as assigning other users as admins or ban them. The website allows users to sign in through their Google accounts or sign up with a new username and password. This project was completed individually under the supervision of Yazan Alhalabi, an Instructor and Full Stack Developer at Integrify.

Developer Connector

MERN Stack (MongoDB, Express.js, React.js, Node.js)

A mock-up web-based social media application for the developer community. This project is a part of an online course "MERN stack Front to Back" completed for the purpose of strengthening relevant development abilities.

SELL Games 2020 (private repository)

MERN Stack (MongoDB, Express.js, React.js, Node.js)

A project that was given by SELL Games organization and LAB University of Applied Sciences. The project was supervised by Jan-Erik Sandelin and the representatives of SELL Games. The goal of the project was to create a website that displays information about various games, such as timetables and team members, and results.

SKILLS

Front end: Bootstrap, CSS, HTML, JavaScript, Material-UI, React.js, Redux, SASS, TypeScript.

Back end: C#, Express.js, Node.js.

Database: MongoDB, PostgreSQL, SQL.

DevOps: Firebase, Heroku, Netlify, OpenAPI / Swagger.

UI / UX Design: Figma.
