## PROFILE

Thao is a determined Full Stack Developer with nearly 3 years of self-learning in Web Design and Software Development. In her past, Thao has gained 2 Bachelor's degrees and over a decade of professional experience in diverse roles and environments such as sales and entrepreneurship. Her background allows her to seamlessly adapt to any team and make a valuable contribution to product development.

## RECENT PROJECTS

### Signal Clone

React Native, Firebase, JavaScript

A mobile application that clones the Signal Private Messenger with cross-platform access and modern styling.

### UberCopy

React Native, Redux, Tailwind CSS, Google API

A mobile application that enables its users to input their current locations and desired destinations to see the map of their full journeys, choose between different taxi services, and see the prices.

### Landing Page

Material-UI, React.js, TypeScript, SASS

A webpage built to serve as a portfolio and showcase all the personal projects.

### Webstore

Material-UI, React.js, Redux, TypeScript, SASS, Jest

An improved version of a project built as a part of a third-party online course about JavaScript. The project is rebuilt from scratch by using TypeScript instead with a pre-made API endpoint.

### Warehouse App

Express.js, JavaScript, Material-UI, Node.js

The main goal of this full-stack application is to showcase how to handle data on the server side. The APIs are provided by Reaktor that combine and cache the data for faster requests.

### Photo App

Bootstrap, Formik, JavaScript, React.js, reactstrap, Redux, SASS

A practice application built to master functionalities such as adding to favorite, naming, sorting, and saving. The photos are hard-coded and fetched from Lorem Picsum.
