Estafette

Estafette is extremely well suited to the UK and Ireland salad onion market and makes a superb variety choice for growers throughout the main season from mid-July onwards. This variety has excellent germination, resulting in extremely uniform growth and maturity. Its upright plant habit assists with good crop husbandry and disease control. In addition this upright habit facilitates efficient harvesting through the ease of skinning a good dark green to white colour contrasted onion. These attributes lead to significant harvestable yield increases compared to the current market standards and a significantly higher marketable yield.

Trial Results

Average bunch per meter

1 = very poor 5 = excellent

Features

- Consistently high germination and plant stand
- Upright plant habit
- Very easy to skin
- The same maturity days as existing market standards

Advantages

- Superb crop uniformity
- Enhances crop husbandry
- Fast and efficient harvest
- Easily fits into production programs

Benefits

- Yield increase compared to current market standards
- Good disease control
- Harvest labour cost savings
- Versatile and well suited to UK and Ireland main season
