# Etappe

**Etappe** is a new addition to the Agility Agriculture salad onion range having the same attributes as Estafette but is slightly quicker to mature. It has good heat tolerance which means that it is well suited to mid-summer UK production. Etappe has an excellent upright plant habit which aids good disease control and ease of harvesting. It also has a good green to white colour contrast making it an attractive variety when bunched or pre-packed. Etappe yields are also consistently higher than current market standards.

## Trial Results

Average germination per meter

Average bunch per meter

1 = very poor 5 = excellent

## Features

- Excellent germination
- Outstanding upright plant habit
- Quicker to mature than current summer market standards
- Good heat tolerance

## Advantages

- Good crop uniformity
- Easy to harvest and significantly aids crop husbandry
- Excellent companion variety to Estafette
- Very well suited to UK summer season

## Benefits

- Higher marketable yield
- Reduced harvest costs and enhanced plant viability
- Increased financial returns from overall program
- Consistently higher yields than current standards
