

# Finally, a platform that solves the challenge of delivering accurate and comprehensive provider referrals.

## Garner DataPro Referrals serves referrals based on the most detailed provider performance and directory data in the industry

Drawing from a wide range of sources, Garner has compiled over 75% of all medical claims data, creating the largest claims dataset in the United States. By combining this objective data—detailing the outcomes of every doctor’s patients—with its experience serving over **one million commercially insured members**, Garner delivers an offering that provides:

- An average savings of **\$1,533 per referral**
- **15% fewer sick days** for members
- Out-of-the- box coverage for over **99% of physicians** nationwide

Garner's insights are built off over 500 specialty-specific quality and efficiency measures, allowing Garner to evaluate millions of healthcare journeys across 82 distinct specialties. The result is a comprehensive yet detailed view of provider performance—offering organizations transparent, data-driven insights into quality and efficiency at the individual provider level.

## A competitive advantage that's easy to say yes to

The Garner DataPro Referrals platform removes the manual work associated with finding doctors. Care navigation becomes more efficient and requires fewer resources, which lowers costs.

Garner DataPro Referrals:

- ✓ Is simple to implement and easy to use
- ✓ Connects into your existing navigation workflows
- ✓ Offers two delivery formats: data API and an intuitive interface
- ✓ Requires no client-by-client setup
- ✓ Comes with all major insurance networks preloaded
- ✓ Provides outcomes and ROI reporting as a standard offering
- ✓ Allows for new provider directories and networks to be easily added
