

MESSAGE FROM THE CEO

This past quarter was an exciting one for Calvert Impact. This is shown in our [2023 Impact Report, “Demonstrate, Educate, Transform,”](#) which features the impact our portfolio partners have on the communities they serve around the world. The report highlights how we are using the Community Investment Note® and our other products to demonstrate that it is possible for everyday investors to use their investment portfolios to drive solutions to social and environmental challenges, educate the broader market, and transform the capital markets. The Impact Report showcases our impact across sectors and on gender and racial equity, as well as on climate solutions, two crosscutting themes that are core to our work. We also [raised the rates on the Community Investment Note®](#) to continue meeting the strong demand our portfolio partners have for capital to serve their communities.

Jennifer Pryce
President and CEO

calvert-impact

@calvertimpcap

We announced the first \$30 million issuance of our newest product, the Cut Carbon Note, issued by Calvert Impact Climate, which finances sustainability upgrades for commercial and multifamily buildings to reduce carbon emissions. Lastly, we, along with our partners Community Preservation Corporation (CPC) and Self-Help, submitted an application to the US Environmental Protection Agency as [Climate United](#) to manage a portion of the National Clean Investment Fund, demonstrating our unique approach to drive decarbonization at scale to benefit low-income and disadvantaged communities.

 Number of new loans and investments originated 3
 Total amount of new loans and investments originated \$13,800,000

Impact Sector Breakdown²

PORTFOLIO PARTNER SPOTLIGHT

The FRB focuses on improving forestland management in the Yuba and Sierra Counties of California, a region plagued by wildfires.

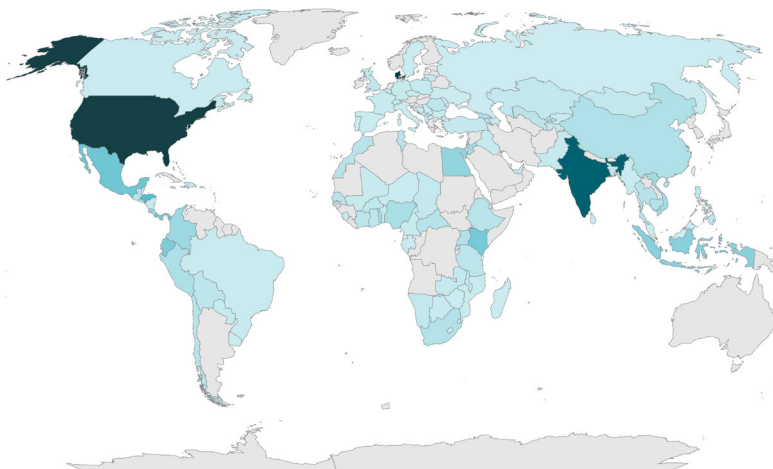

Forest Resilience Bond

The Forest Resilience Bond (FRB) is a financing mechanism to raise private capital to fund the upfront costs of forest restoration. The FRB, developed by Blue Forest Conservation in partnership with the World Resources Institute, kicked off a forest restoration project protecting 15,000 acres of forestland in the North Yuba River watershed using ecologically based tree thinning, meadow restoration, prescribed burning, and invasive species management—all specifically designed to reduce the risk of severe fire, improve watershed health, and protect water resources.
