

Climate United is a collaboration of experienced, mission-driven lenders and investors dedicated to bringing accessible clean energy solutions to Justice40 communities across the country

ABOUT US

Calvert Impact, Community Preservation Corporation, Self-Help are joining forces to form Climate United, a consortium that will compete to manage an award from \$14 billion National Clean Investment Fund, a component of the Greenhouse Gas Reduction Fund (GGRF).

The consortium will leverage public funds to transform under-resourced markets in pursuit of more inclusive low-carbon transition. A coordinated, national strategy will demonstrate the benefits of clean energy to all Americans - particularly those living in Justice40 communities - by delivering better health, lower energy costs, and equitable economic opportunity.

WHY CLIMATE UNITED?

The consortium was formed to bring unparalleled experience across sectors and geographies to support implementation of the National Clean Investment Fund.

FINANCIAL & RISK MANAGEMENT

- Raised and deployed more than \$40 billion across partners in a variety of sectors in all 50 states
- Deep experience managing large-scale public-private partnerships
- Significant infrastructure in investment and portfolio management, risk management, and internal controls

GREEN DEPLOYMENT

- Deployed more than \$15 billion in clean energy, energy efficiency, and other GHG reducing technologies and activities, causing \$47 billion in total investment
- Developed substantial pipeline, partnerships and access to robust deployment channels across sectors and geographies

TRUST IN COMMUNITIES

- Deployed more than 60 percent of historic lending and investment for the benefit of people living in Justice40 communities
- Developed vast networks and relationships with local community-based organizations, prioritizing equity and access in program and product design

CLIMATE UNITED IS A CROSS-SECTOR, NATIONAL STRATEGY FOCUSED ON DEMONSTRATING THE BENEFITS OF THE CLEAN ENERGY TRANSITION FOR ALL AMERICANS

Focus sectors will include:

Distributed Power Generation and Storage

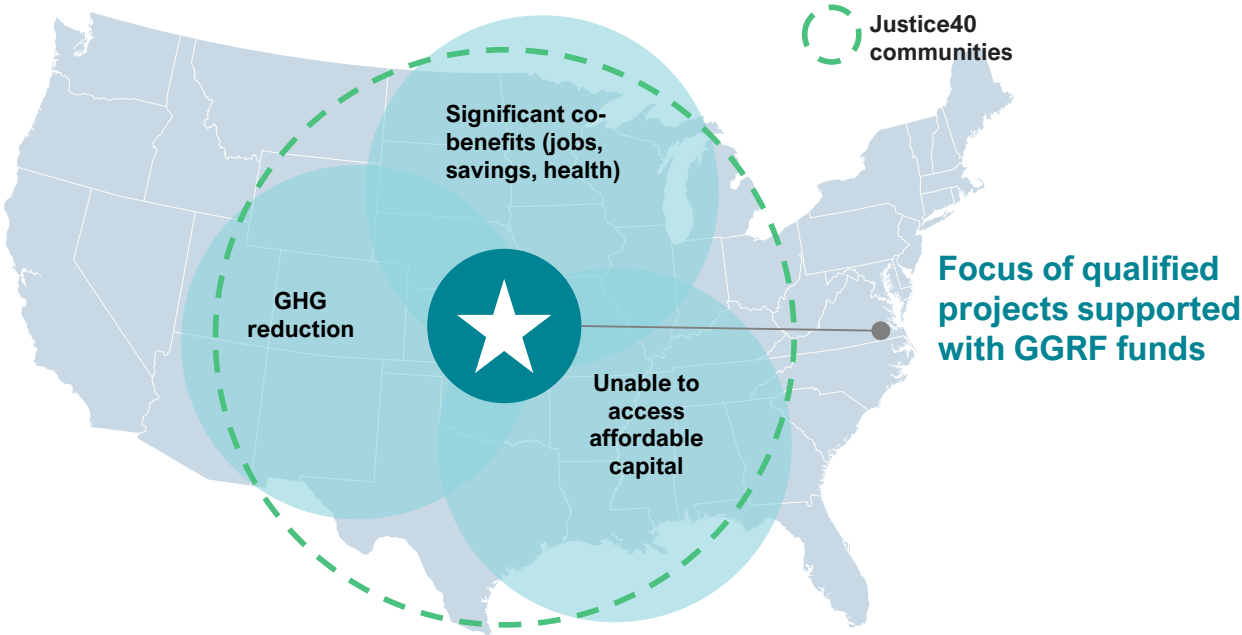

Building Decarbonization

Transportation Pollution Reduction

All investments across the platform will dramatically reduce GHG emissions to support the U.S.'s climate goals

Managed by:

Community Preservation Corporation

With origination and strategic support from:
