

1. Scope of the Quality Management System Standard

1.1. Background

- OneOcean has been serving the shipping industry since 1998 and has developed its well-deserved reputation as being the world's largest distributor of navigational data, nautical charts, marine technical publications and digital products.
- We have played a major role of the innovation in navigation, regulation, safety and environmental compliance which now defines us in our trade.
- OneOcean are committed to delivering solutions which stand up to the demands of an industry that is constantly changing and remain at the forefront of it. We have developed various products and services of high quality whilst also considering our environmental aspects and impacts to ensure efficiency in areas of route mapping, general safety and compliance. Our products and services include: PassageManager, Regs4ships, EnviroManager, FleetManager, Regs4ships, Digital Product, Paper Products and Docmap.
- Our integrated management system has been designed and developed to manage our quality management system standards meeting the requirements of our planned arrangement and the international standards to deliver the scope outlined below. We have mapped out our operational processes, identifying areas of risk and opportunities management to ensure continual improvement in our business operations.
- OneOcean has recognised the importance of our interested parties and aim to meet their needs and expectations. Our management system has captured compliance obligations including all other applicable requirements in our industry sector. The business context has captured relevant internal and external issues that could affect our ability to achieve intended outcomes of our quality management system to ensure these are effectively managed.
- Innovative solutions combined with global locations mean that OneOcean can provide a market leading solution to the most demanding of fleets.
