Cinema and Technology

Cinema and Technology focuses on the relationship between moving images and technology. Examining the ways in which media technologies have shaped – and been shaped by – the experience and understanding of the world, the series encompasses and invites a range of perspectives on moving-image technologies: their nature, functions and use in industrial, cultural, generic, experiential, material, social, and political contexts.

Actively Seeking Proposals

The series welcomes scholarly monographs and edited volumes in English, by both established and early-career researchers.
