**Keywords of Identity, Race, and
Human Mobility in Early
Modern England**

What did it mean to be a stranger in sixteenth- and seventeenth-century England? How were other nations, cultures, and religions perceived? What happened when individuals moved between languages, countries, religions, and spaces? *Keywords of Identity, Race, and Human Mobility* analyses a selection of terms that were central to the conceptualisation of identity, race, migration, and transculturality in the early modern period. In many cases, the concepts and debates that they embody – or sometimes subsume – came to play crucial roles in the articulation of identity, rights, and power in subsequent periods. Together, the essays in this volume provide an invaluable resource for anyone interested in the development of these formative issues.
