Mauricio Nieto Olarte

Exploration, Religion and Empire in the Sixteenth-century Ibero-Atlantic World

A New Perspective on the History of Modern Science

The Iberian conquest of the Atlantic at the beginning of the sixteenth century had a notable impact on the formation of the new world order in which Christian Europe claimed control over most a considerable part of the planet. This was possible thanks to the confluence of different and inseparable factors: the development of new technical capacities and favorable geographical conditions in which to navigate the great oceans; the Christian mandate to extend the faith; the need for new trade routes; and an imperial organization aspiring to global dominance. The author explores new methods for approaching old historiographical problems of the Renaissance—such as the discovery and conquest of America, the birth of modern science, and the problem of Eurocentrism—now in reference to actors and regions scarcely visible in the complex history of modern Europe: the ships, the wind, the navigators, their instruments, their gods, saints, and demons.

BIOGRAPHY
Mauricio Nieto Olarte is titular Professor at the Department of History and Geography as well as Dean of the Faculty of Social Sciences at the Universidad de los Andes, Bogota, Colombia.

"An ambitious work that takes an original approach to establishing how the Spanish sought to build and understand their Atlantic empire, viewing technological practices as part of the broad networks of diverse actors where scientific, technical, political, religious and commercial factors converged. Nieto’s clear and compelling narrative highlights the importance of understanding the interactions of these “machines of empire”, an approach that allows us to understand anew how the Spanish saw themselves as fulfilling a providential mission in America."

– Dr Edward Collins, University College Dublin

KEYWORDS
Science, technology, empire, navigation, cartography, Iberian Science, Eurocentrism
# TABLE OF CONTENTS

List of illustrations  
Acknowledgments  

Introduction  
The New World and the problem of Eurocentrism  
Science and empire  
Summary of the chapters in this book  

1. The Iberian Peninsula and the Atlantic  
Portugal and Spain  
Winds, currents, and sailing ships in the Atlantic  
Gold, silver, slaves, souls, and a thousand kinds of trees  

2. The imperial bureaucracy and the appropriation of the New World  
Seville and the Casa de Contratacion  
The universal monarchy  

3. The piloto mayor: cosmography and the art of navigation  
The post of piloto mayor: seamanship and cartography  
The navigation manuals  
Manuals for the Empire  
Publications, dissemination, and secrecy  
Humanism and the classics  
Experience and authority  
Man against the sea: shipwrecks and meteorology  
Routes and chorographic descriptions: The New World within the new global order  

4. Machines of the empire  
The ships  
Shipbuilding  
War and artillery  
Navigational instruments  

To order this book visit [www.aup.nl](http://www.aup.nl)
The astrolabe
The cross-staff
The mariner’s compass
Time and clocks
The sounding/plumb line
The navigation charts
Astronomical tables
Instruments, measurements, precision, and standardization
The crew
The captain/admiral
The pilot
The shipmaster (maestre) and quartermaster (contramaestre)
The boatswain (guardian)
The ordinary seamen (marineros)
Midshipmen (grumetes) and cabin boys (pajes)
The carpenter, steward, cooper, and cook
The scribe, master-at-arms, and overseer
The cannoneer
The barber/surgeon
The priest
Life on board
The argot of the sailors
Overcrowding
Food and health
Men of the sea and men of God

5. The Master Map (Padrón Real) and the cartography of the New World
Nautical charts and how they were made
The making of a chart
The charts of tierra firme: the earliest maps of the New World
Three early maps of the New World
Juan de la Cosa (1500)
Waldseemuller (1507)
Diego Ribero (1520)
6. The creatures of God never seen before: natural history
Nature in the New World
The classics and the Bible
Monsters in paradise
To describe, classify, and name
Medicine, botany, and the knowledge of the natives
The Empire and natural history

7. The New World, global science, and Eurocentrism
Plus ultra
Experience and authority
The Empire and the challenge of standardization
Eurocentrism
