Acutronic Simulation & Test USA (ASTU) is looking for a Wire Person to join our Pittsburgh, PA team. Our model candidate would have at least three years of experience in electronics with a concentration in wiring; an Associate's degree in Electronics/Wiring; soldering skills; and advanced knowledge of electrical components and power wiring. Keen attention to detail, ability to prioritize and multi-task in a fast-paced, deadline-driven environment are critical for success in this role.

For 45 years, Acutronic's Motion Simulation & Test Division has been the global market leader in the development, design, and manufacture of Inertial Guidance Test Systems and Hardware-In-The-Loop motion simulators. These high-precision motion simulators are used in the aerospace, defense, automotive, and consumer electronics industries to test and calibrate sensors and missiles.

Acutronic's Aerospace Components Division develops and manufactures specialty components for use on unmanned aerial vehicles and optionally-piloted aircraft. These products are used on next-generation aerospace programs and include a range of electric power systems, servo-actuators, micro-turbines and Hybrid-Electrical-Propulsion-Systems. Acutronic Aerospace offers standard products and excels at designing highly-customized solutions for demanding mission requirements.

Acutronic employs approximately 200 employees across its locations in Austin, TX; Pittsburgh, PA; Baltimore, MD; Switzerland; Germany; and India.

This is a unique opportunity to join a company with ambitious growth plans. We offer a high degree of independence and individual responsibility in an exciting industry, along with a competitive compensation and benefits package.

Acutronic is seeking a
Wire Person II

Your roles/responsibilities will include:

- Assemble, modify, rework, and repair mechanical and electronic assemblies for standard and specialized products
- Review and interpret interrelated wiring and assembly drawings
- Perform complete wiring and assembly operations on chassis, panels, simulators, assemblies and cabinets without immediate supervision
- Provide feedback to Engineering team after redlining changes on drawings in assembly book

Your qualifications/skills should include:

- Associate of Science degree in Electronics/Wiring, preferred
 - At least three years of experience in electronics with a concentration in wiring, required
 - A combination of education and experience will be considered
 - Ability to travel up to 10% domestically; occasional international travel may be necessary
 - US Citizenship required
-
