

Mixing Infant Formula or Milk: Special Recipe

Mixing Instructions for: _____

Your infant needs a special formula or milk recipe. Follow these instructions closely when mixing. Make sure you measure the infant formula powder and all liquids correctly. Please measure the liquid and powder separately.

Unless stated otherwise, measure all formula powder in unpacked, level scoops and all water in ounces.

	Plus		Equal s	Final Volume
	+		=	
	+		=	
	+		=	
	+		=	

Put formula in fridge for 24 hours then discard.
Do not heat formula in a microwave oven.

Notes:

Use clean bottle or tap water to make infant formula. Check with your local health department about the safety of your tap water supply. If your water supply comes from a well, have the water tested to make sure it's safe before using it for your baby. To make water safe, bring water to a rolling boil for 1 minute, cool quickly (no longer than 30 minutes) and prepare formula.
