Health Facts for You

Cystoscopy with Hydrodistension

A cystoscopy is done to let your doctor see the wall of your bladder. During this exam, you will be asleep (under anesthesia). A special camera and light are used to look at the inside of the bladder. Your doctor may use a medicine (lidocaine) to numb the urethra.

After the Exam

For 1-2 days, you may have pain. Some people may have pain for up to 3 weeks. You will have pain pills to take. You may also have medicine to help relax your bladder.

You may have blood in your urine. This should stop in 2-3 days. It is common for you to feel burning when you pass urine for 1-2 days.

Diet

- You can resume a normal diet as you are able.
- Drink 8-10 glasses of fluid each day to prevent dehydration.
- Do not drink alcohol within 24 hours of your exam or while taking pain pills.

Activity

- Walking is okay.
- Talk with your doctor about going back to work.
- Do not drive for 24 hours after your exam.
- Do not drive while taking pain pills.

Follow-Up

Your first follow-up visit will be 2-4 weeks after your exam.

When to Call

- Problems passing urine
- Red or bloody urine for more than 3 days after your exam
- Large blood clots in your urine
- Temp. by mouth is over 101° F
- New low back or hip pain
- Cloudy or foul-smelling urine
