Full Liquid Diet

The full liquid diet includes mostly liquids and some food with small amounts of fiber. The full liquid diet can provide many of the nutrients your body needs, but it may not give enough vitamins, minerals, and fiber.

A fluid is anything that is liquid if left at room temperature. Some examples are:
- Coffee, tea, and other hot drinks
- Gelatin
- Gravy
- Ice cream, sherbet, sorbet
- Ice cubes, ice chips
- Milk, liquid creamer
- Nutritional supplements
- Popsicles
- Vegetable and fruit juices
- Yogurt (without nuts, seeds, or fruit)
- Soft drinks, lemonade, limeade
- Soups (strained or smooth puree)
- Syrup

This diet should only be used briefly as you recover until it is safe for you to eat regular foods. Your dietitian can help you create a balanced full liquid meal plan to give you the nutrients you need, if needed.

Tips
- Figure out which foods/fluids from the list most appeal to you.
- Eat or drink your favorite flavors to help you enjoy this diet.
- Include milk-based or dairy-type fluids and juices. If you are lactose intolerant, choose nut and seed milks.
- Eat 3 full liquid meals throughout the day and include a snack between each meal.
- Drink nutritional shakes in 6-8-ounce servings as part of a meal or between meals to make sure you are taking in enough calories. You can make fortified shakes for yourself or buy them premade at a store.

### Sample 1-Day Menu for a Full Liquid Diet

<table>
<thead>
<tr>
<th>Meal</th>
<th>Menu</th>
</tr>
</thead>
</table>
| **Breakfast** | ½ cup orange juice (without pulp)  
1 cup cream of wheat  
1 cup milk  
6-8 ounces yogurt (without nuts, seeds, or fruit)  
Coffee or tea |
| **Lunch** | 1 cup apple juice  
1 cup tomato soup  
½ cup chocolate pudding  
1 cup high protein* vanilla shake |
| **Dinner** | ½ cup grape juice  
1 cup milk  
1 cup high protein* chocolate shake  
1 cup strained, blended cream of broccoli soup  
½ cup custard |
| **Snack(s)** | 1 cup high protein* shake or nutritional supplement |

*A high-protein shake should contain at least 8-10 grams of protein per serving. Read product labels to find a shake that is high in protein. If you are making the shake at home, you can increase the amount of protein by adding protein powder, non-fat dry milk powder, yogurt, or milk.*
