Health Facts for You

Caring for Your Child After an Adenoidectomy

This handout will tell you how to care for your child at home after an adenoidectomy.

What to Expect

- A sore throat for up to a week.
- A small amount of bloody drainage from the nose is common.
- A low-grade fever up to 102° F is normal. It can last up to 7 days after surgery.
- Neck pain is common for up to 10 days. A warm heating pad (not hot), soaking in a warm bath, or massaging the neck may help.
- Foul smelling breath for 2 to 3 weeks.
- Nasal-sounding voice and/or snoring for a while. This will go away in time. If it lasts longer than 3 months, tell your doctor.
- Restless sleep or nightmares may occur for a couple of weeks.

Diet

Your child may feel sick to their stomach from the anesthesia. Start with clear liquids. Add solid food, as your child can handle it. If they vomit, start over with clear liquids.

Have your child drink plenty of fluids. Give liquids often, even if they are just sips.

Pain

Your doctor may suggest giving acetaminophen (Tylenol®), along with ibuprofen. You will be told the dosages for both of these the day of surgery.

Activity

Your child may go back to school or daycare in 2 to 5 days if they feel well. They can take part in normal routines as soon as they feel able.

When to Call

- Nausea and vomiting that doesn't go away.
- Fever over 102° F
- Bleeding from the nose or mouth that doesn't stop.
- Pain that doesn't go away after Tylenol® and ibuprofen.
- Questions or concerns

Who to Call

Pediatric ENT Clinic Monday through Friday, 8:00 am – 4:30 pm (608) 263-6420, option 3

After hours, weekends or holidays, this number will give you the paging operator. Ask for the otolaryngology (ENT) doctor on call. Leave your name and phone number with the area code. The doctor will call you back.

The toll-free number is 1-800-323-8942.

Your health care team may have given you this information as part of your care. If so, please use it and call if you have any questions. If this information was not given to you as part of your care, please check with your doctor. This is not medical advice. This is not to be used for diagnosis or treatment of any medical condition. Because each person's health needs are different, you should talk with your doctor or others on your health care team when using this information. If you have an emergency, please call 911.
