

Stereo Inputs – Source Connection

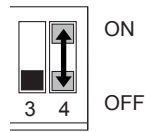

Multichannel Inputs – Source Connection

STEP 1

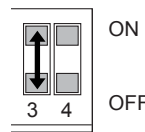

- Connect a loudspeaker to the 'CENTER' output of the subwoofer and feed an 85 Hz test signal to the 'CENTER' input.

STEP 2

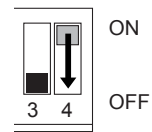

- Toggle the -180° phase switch 'ON' and 'OFF' and set it to the position which gives the lowest sound level at the listening position.

STEP 3

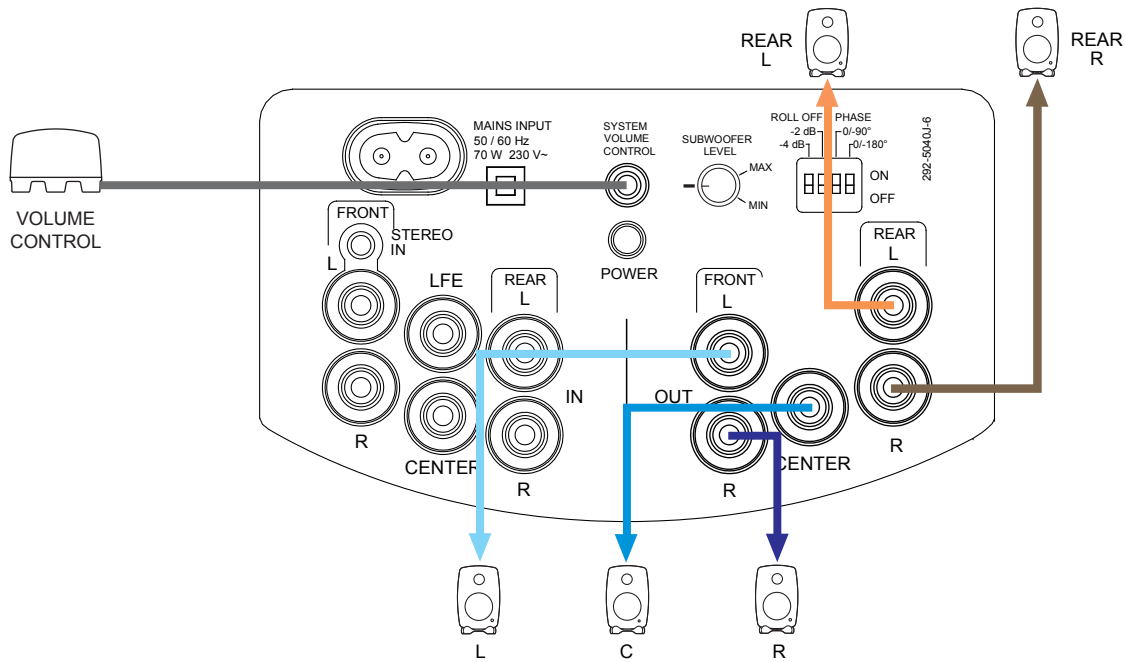

- Next toggle the -90° phase switch 'ON' and 'OFF', and again set it to the position which gives the lowest sound level.

STEP 4

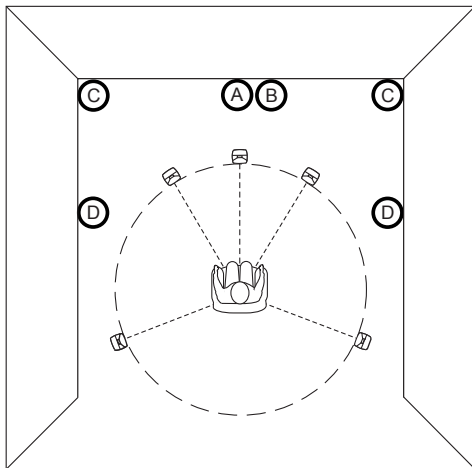

- Finally, set the -180° phase switch to the opposite setting.
